Summary

I'm a Computer Science Engineering student with a strong interest in business intelligence and data analytics. I enjoy working with data—collecting it, cleaning it, analyzing it, and creating dashboards that help people understand it better. Right now, I'm learning tools like Power BI, SQL, Excel, and Python. I've worked on projects where I built simple dashboards, analyzed datasets, and created reports that show trends and insights. I like using data to answer questions and help solve problems. I'm always excited to learn new things. I enjoy watching tutorials, trying out small projects, and understanding how different tools work in real situations.

Skills & Tools:

Power BI · SQL · Excel · Python · Data Visualization · Dashboard
Design · Data Analysis

Hobbies & Interests:

Creative writing · Poetry · Visual aesthetics · Reading fiction ·
Exploring digital design tools

Beyond tech, I find joy in writing poetry and creative stories—little windows into emotions, moments, and thoughts. I also love to strum my guitar to unwind, and enjoy crocheting geometric patterns when I need a break from screens.

If you're passionate about data, storytelling, or simply curious—I'd love to connect!

Experience

McKinsey & Company

McKinsey Forward Learner

September 2025 - Present (1 month)

I've been accepted into the McKinsey Forward Program — a global 10-week learning initiative designed for young professionals.

This program is helping me grow both professionally and personally, while connecting with a diverse global network of peers.
